

WILD AUSTRALIA

Where, When and Under What Conditions Is Wildlife Observed?

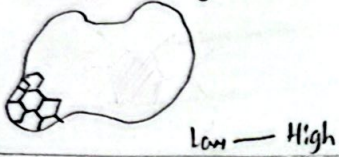

Short introduction

[Observation] [Species] [2018-2024] [4 Groups]

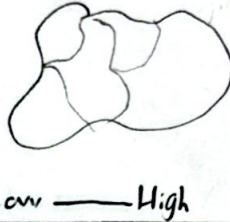

Birds • Mammals • Reptiles • Amphibians

Q1 - WILDLIFE ACROSS AUSTRALIA
Where is wildlife being observed?

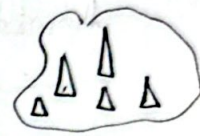

Observation Density

Species Richness

Wildlife Composition Across Australia

Size = observations
Colour = dominant animal group

Q2 - DIFFERENT ANIMALS DIFFERENT PLACES
Do animal groups show different geographic patterns?

State x Group

0 — 100

Spatial Small Multiples Maps

Bird

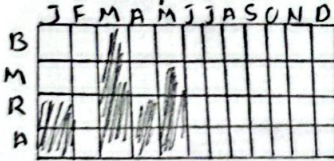

Mammal

Reptile

Amphibian

Q3 - WILDLIFE THROUGH THE SEASONS
When are different animals observed?

Animal Group x Month Heatmap

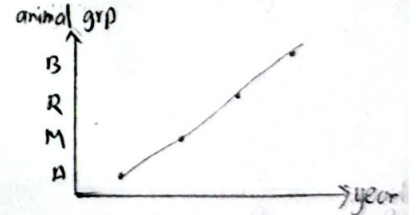

0 — 100

Year x Month Heatmap

0 — 100

Observation Trend over Years

Q4 - WEATHER & WILDLIFE
How are observations associated with climate?

Rainfall x Temperature Heatmap

Rainfall

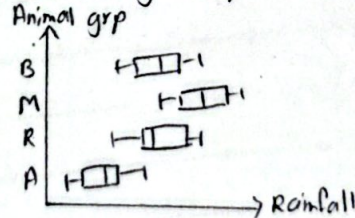

Wet

Dry

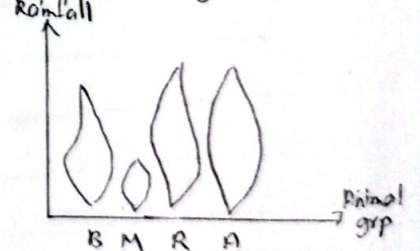

Cool Warm — Temperature

Rainfall by Group

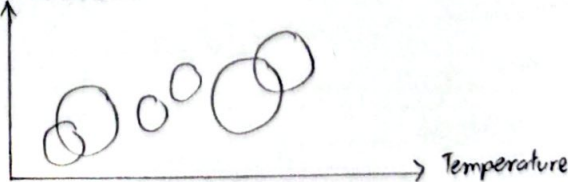

Temperature by Group

Q5 - THE BIGGER PICTURE
Under what conditions is recorded wildlife diversity greatest?

Climate vs Recorded Species Richness

SUMMARY

Finding 1 : _____

Finding 2 : _____
